ITMD 441/541

Lab 2

Introduction

This first lab will have you write a very simple HTML and CSS UI for an index page and create a class GitHub Repository.

Requirements

- Unzip the Lab2.zip file and add all the files to your GitHub repository.
- Make sure to keep all the files in the same relative locations so the CSS and images work
- Follow the directions in the index.html page for each section so that you make the provided HTML look like the example.
- Do Not make any edits to the index.html page other than adding your name where is instructs you too.
- Do Not make any edits to the global.css file.
- Publish your finished work to GitHub and GitHub Pages
- Test the GitHub Pages URL in your browser to ensure it all works before you submit
- Submit your GitHub URLs to the blackboard assignment in the text field as described in the submissions section below.

Graduate Additional Requirements

If you are involved in **any section of 565** you need to complete the additional requirements listed here.

Graduate students will be graded to a higher standard for this assignment.

README File

Not specifically required for this Lab but please create a README file as part of your repository creation for future use.

Due Date

This assignment is due **Wednesday September 27, 2022 6:30 PM Chicago Time, before next class**. **No Extensions or Exceptions. Late policy in syllabus applies.**

Submission Guidelines

You must upload your submission, to the blackboard assignment by the due date. The submission must be in the following format and structure. If you do not submit your assignment exactly as specified, you will receive an immediate 10% deduction.

Submission Specifications

Submit to the blackboard assignment the URLs to your GitHub repository and GitHub Pages hosted Lab index page.
